

MTG Artifactool

A tool to convert Magic: The Gathering decklists between different formats, specifically from Moxfield to Cardmarket.

Setup

1. Clone this repository
2. Ensure you have Python 3.x installed

Usage

1. Create a `moxfield-list.txt` file in the root directory with your decklist exported from Moxfield
2. Run the conversion script:

```
python scripts/run-moxfield-to-cardmarket.py
```

3. Find your converted list in `cardmarket-list.txt`

File Format Examples

Moxfield Input Format

```
1 Jarad, Golgari Lich Lord (GK1) 65
1 Arcane Signet (MIC) 157
1 Birds of Paradise (RVR) 133
```

Cardmarket Output Format

```
1 Jarad, Golgari Lich Lord (Guilds of Ravnica: Guild Kits)
1 Arcane Signet (Commander 2021)
1 Birds of Paradise (Ravnica Remastered)

## Expansion Mappings
The tool uses a CSV file (library/expansions.csv) to map set codes to their full names. The format is:

## Contributing
